

BLUEBERRY

Bushel and Berry 'Glaze'— Mid-season. Glossy, dark green foliage. Perfect for containers or a small hedge. Small berries are extremely tasty! Compact growth, 2-3'x2-3', Zone 4.

Bushel and Berry 'Perpetua'— Mid Season and Fall. A true double cropping blueberry that produces small, sweet and mild fruit. Grows to 4' x 4', Zone 4.

Bushel and Berry 'Peach sorbet'— Mid-season. Foliage changes from peach to pink to dark purple in fall. Perfect for a container! Large berries. Compact growth, 2-3'x2-3', Zone 4.

Bushel and Berry 'Jelly Bean'— Mid-season. Bright green foliage with hints of red. This variety is great for a patio container and also makes a great hedgerow! Large berries. Compact growth, 2-3'x2-3', Zone 4.

Bluecrop— Large berries. Great taste. Easy care. Ripens mid July (mid). Grows 6'x 6'. Zone 4

Bluejay— Easy to grow, tolerates part shade and dry acidic soils. Ripens Aug (mid). Purple-red fall foliage. Great wildlife attractant for bees and birds. Grows 5-7'x 5-7'. Zone 4.

Blueray— Large berries. Great flavor. Produces heavy yields. Ripens mid July (mid). Grows 4-5'H x 4-5' W. Zone 4.

Elliot— Extremely productive, sweet, small to medium sized berries. Ripens late season. Red foliage in the fall. Grows 5' x 5'. Zone 4.

Jersey— Very productive. Sweet, small to medium-sized, late season fruit. 6-7'H x 6-7' W. Zone 4.

Patriot—Early season fruit. Beautiful fall color. Massive yields. Grows 4' x 4' W. Zone 3.

GRAPE

Concord Seedless—Blue grape. Great for jellies and preserves. Zone 4.

Lakemont— Seedless, golden yellow fruit. Great for fresh eating. Very sweet flavor. Zone 5.

Canadice— Seedless red grape. Compact clusters of large sweet fruit. Zone 5.

Reliance— Seedless red grape. Medium sized fruit ripens September. Great for eating fresh, juice and jellies. Zone 4.

Note: Grapes grow as high as they are trained, meaning as high as the support that they are growing on.

BLACKBERRY

Bushel & Berry Baby Cakes— Large, sweet berries on a thorn-less plant. Produces two crops, in mid-summer & fall. 3-4', Zone 4.

Black Satin— Large sweet berries that ripen in late July or early August. Thorn-less. 6-8', Zone 4.

Bristol Black— Very large and very sweet. Ripens in July. Great for eating fresh and baking. 6-8', Zone 4.

Chester— Large, very sweet, high quality fruit. Ripens in July. Good resistance to cane blight. Thorn-less. 6-8', Zone 5.

RASPBERRY

Caroline—Most productive fall bearing raspberry! Large and flavorful fruit. Great fresh or for pies, and pastries. Extremely hardy. 6-8', Zone 4.

Heritage—Ever-bearing. Medium, firm fruit sweet with mild flavor. Ripens in July and again in September. Cut out fruiting canes after spring crop. 6-8', Zone 2.

Jewel— Large, very flavorful black raspberry. Ripens early. 6-8', Zone 4.

Latham—Red raspberry, perfect for canning and freezing. Very heavy bearer, easy to grow. 6-8', Zone 3.

Polana— Medium, firm fruit with sweet flavor. Ever-bearing, ripens in July and again in August. Easy to grow! 6-8', Zone 3.

Bushel and Berry Raspberry Shortcake— Bright red fruit on a compact plant. Good for containers. 3-5', Zone 3.

RHUBARB

Plant in rich soil with approximately 3' between plants. Do not harvest the first season. Divide plants every four to five years (leaves are poisonous).

STRAWBERRIES

Everbearing & June-bearing

Plant in spot with full sun for most of the day. Prepare soil with organic matter (compost), and approximately 1 lb. of 5-10-5 fertilizer per 100sq'. Space plants 8-12" apart. Remove runners as they appear to increase the plants yield. If strawberries are to be used as a perennial crop, remove the flower stalks the first year to improve second year growth. Mulching with hay can help keep weeds down between plants and can also be used for winter protection in a 3-4" layer.

FRUIT TREES

APPLES

- Cortland**—Dark red skin, medium sized apple. Crisp pure white flesh resists browning when cut. Good all-purpose apple for
- Empire**— Apples are red, juicy, firm, crunchy and sweet. They ripen during September and October, and will keep until January. Semi dwarf (12-15'), Zone 4.
- Fuji**— Light green skin with red blush. Sweet, crisp and juicy, ripens in October. Stores well. Pollinate with any mid-season ripening apple. Semi-dwarf (12-15'), Zone 5.
- Gala**— Mottled fruit with a mild sweet taste. Very aromatic. Early ripening, in September. Semi-dwarf (12-15'), Zone 4.
- Honey Crisp**— Yellow turning red when exposed to sun. One of the most desired, sweet, juicy and crisp fruit. Ripens late September. Pollinate with Granny Smith, Fuji, or crabapple. Semi-Dwarf (12-15'), Zone 3b
- Macoun**— A New England favorite. High quality, dark red, firm fruit. Considered by many the best overall apple for fresh eating.
- McIntosh**— A classic cold climate apple, discovered in Canada in 1811. Red color, superb tart flavor. Semi-dwarf (12-15'). Needs a pollinator. Zone 4.
- Malus 4-way**— Assorted varieties grafted onto one root stock. Please see an employee for more info.
- Yellow Delicious**— Yellow with a pink blush on a medium sized fruit, ripens mid-September. Crisp, white flesh resists browning when cut. Superb for cooking and baking. Self-pollinating. Semi-Dwarf (15'), Zone 5.

PEACH

- Elberta**— The most popular peach tree! Golden yellow with blush red fruit. Large freestone. Ripens late August. Self-pollinating but best fruit set with additional peach tree. Dwarf (8-10'), Zone 5.
- Redhaven**— Firm skin with almost no fuzz. Excellent fruit texture. Blooms late to avoid spring frosts. Self-pollinating. Semi-dwarf (12-15'), Zone 5.
- Reliance**— Yellow skin with a red blush. Yellow flesh is soft and juicy. Very hardy. Ripens mid-August. Self-pollinating but best fruit set with an additional peach tree. Freestone. Dwarf (8-10'), Zone 4.

PEAR

- Bartlett**— Vigorous, productive tree that bears fruit at a young age. Fruit is large, golden yellow and highly flavored. Ripens late August. Pollinate with D'Anjou or Summercrisp. Semi-Dwarf (12-15'), Zone 5.
- Bosc**— Dark yellow fruit with cinnamon russet skin. Medium to large fruit size. Great for eating fresh. Ripens late September. Pollinate with Summer Crisp or Bartlett. Semi-Dwarf (12-15'). Zone 5.
- Moonglow**— Large, blushed, Bartlett style pears. Soft juicy fruit. Ripens in August. Resistant to fire blight. Best pollinated with Bartlett. Semi-dwarf (12-15'), Zone 5.
- Shinseiki**— Moonlight yellow. Desert cultivar. Heavy bearing and beautiful. Ripens August/September. Pollinate with Bartlett. Semi-Dwarf (8'-10'). Zone 4.

SWEET CHERRY

- Bing**— America's favorite cherry! Large, meaty, heart shaped fruit is very sweet. Needs pollination from Stella, Lapin or Black Tartan. Semi-Dwarf, (15') Zone 5.
- Black Tatarian**— Heavy bearer of bright, purplish-black fruit. Rich and juicy. Golden color in fall. Needs pollination from any other sweet cherry. Semi-Dwarf (15'), Zone 5.
- Three-way Cherry**— Assorted varieties grafted onto one root stock. Please see an employee for more info.
- Stella**— Large, dark red fruit. Sweet, rich flavor. Moderate crack resistance. Self-pollinating. Semi-dwarf (15'). Zone 5.
- Lapins**— Large, deep red fruit. Superior flavor to Bing. High crack resistance. Self-pollinating. Semi-dwarf (12-15'). Zone 5.

SOUR CHERRY

- North Star**— Light red skin with red flesh. Produces heavy crops and is disease resistant. Very hardy. Good for pies and preserves. Ripens mid-June. Self-pollinating. Dwarf (6-9'), Zone 4.

PLUM

- Santa Rosa**— Large red fruits with gold flesh. Very vigorous and easy to grow. Ripens in July. Semi-dwarf (12-15'), Zone 5.
- Shiro**—The best of the yellow plums. Heat tolerant, and ripens in late summer. Dwarf (8-10'). Needs a pollinator. Zone 5.
- Stanley**— Purple skin with yellow flesh. Perfect for eating right off the tree! Ripens in September. Self-pollinating. Semi-dwarf (15-18'), Zone 5.

*Some varieties may not be available at certain times of the season.
